

Lab 08 - Project progress updates

In this lab you will be asked to report the progress of your project.

Tasks done last week

Each student is required to report the tasks they have completed in the previous week. This includes:

- A summary of the work accomplished.
- Any challenges faced and how they were overcome.
- Key milestones achieved.
- Code snippets or screenshots demonstrating completed features.
- Time spent on each task.
- Any deviations from the original plan and reasons for those changes.
- Lessons learned from the completed tasks.

Tasks to be done this week

Students should outline the tasks they plan to undertake in the upcoming week. This section should include:

- A detailed list of tasks and objectives.
- Estimated time for each task.
- Dependencies or prerequisites for each task.
- Expected challenges and strategies to address them.
- How these tasks align with the overall project timeline and goals.
- Any resources or support needed to complete the tasks.

Problems (stuck)

Students should identify any problems or obstacles they are currently facing that may hinder their progress. This section should cover:

- A clear description of the problem.
- The impact of the problem on the project timeline.
- Steps already taken to resolve the issue.
- Any assistance or resources required to overcome the problem.
- Suggestions for potential solutions or alternative approaches.

Weekly Progress Report Template

To facilitate consistent reporting, students can use the following template for their weekly progress updates:

Weekly Progress Report - Week [X]

Tasks Done Last Week

- [Task 1]: Description, time spent, challenges, milestones, code snippets/screenshots
- [Task 2]: Description, time spent, challenges, milestones, code snippets/screenshots

Tasks to be Done This Week

- [Task 1]: Description, estimated time, dependencies, expected challenges, alignment with project
- [Task 2]: Description, estimated time, dependencies, expected challenges, alignment with project

Problems (Stuck)

- [Problem 1]: Description, impact, steps taken, assistance needed, potential solutions
- [Problem 2]: Description, impact, steps taken, assistance needed, potential solutions
